BuildingIQ Expands Global Presence with new U.S. Offices

Expansion further drives company's commitment to redefining the way energy is managed in commercial buildings

San Francisco – August 16, 2011 – [BuildingIQ](#), a leading energy management software company, has expanded its global presence with new offices in the San Francisco Bay Area and North Eastern U.S., continuing its efforts to redefine the way energy is managed in commercial buildings.

BuildingIQ's expansion to the U.S. comes at a time when power grids struggle to cope with increasing energy demand. BuildingIQ's unique [software solutions](#) lower energy consumption and connect commercial buildings to the Smart Grid, reducing peak power loads in commercial buildings without costly upgrades or capital expenditures. In a variety of installations worldwide, BuildingIQ's software has achieved up to 30 percent peak load reductions and 40 percent HVAC savings.

“Commercial real estate is prime for embracing solutions that deliver energy savings without capex. BuildingIQ is at the forefront of providing solutions to enable this next generation of energy management,” said Mike Zimmerman, CEO of BuildingIQ. “Our expansion will enable BuildingIQ to continue to extend our global presence, expand our market leadership and drive change in the way commercial buildings manage energy.”

BuildingIQ is currently working with top REITs, corporations and utilities in the U.S. and Australia.

About BuildingIQ

Founded in 2009, [BuildingIQ](#) is a leading energy management software company whose mission is to redefine the way energy is managed in commercial buildings. BuildingIQ's suite of software offerings are unique, patent-pending PEAC Energy Optimization™ technology. These offerings reduce energy cost and consumption, helping facility owners, managers and occupants get more value out of their existing energy systems. BuildingIQ has commercialized 15+ years of building control systems, modeling and comfort research developed by the world-leading experts at the Energy Division of the Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australia's national research organization, and combined it with industry expertise to offer commercial facility owners and managers high value solutions with no capital expense outlay.

The company has been honored as Winner of the AIRAH Award for Excellence in Innovation, Tech23's Greatest Potential Award, *Red Herring's* Asia 100 Award and most recently *Environmental Design + Construction* and *Sustainable Facility's* Readers' Choice Award and *Connectivity Week's* Buildy Award.
